

# Take command of communication with lightning-fast connections

KsFiberNet supplies dedicated broadband as your crucial connection to the communication and information framework.

Partnering with government agencies, we provide a more-efficient network and greater bandwidth, along with competitive rates, by:

- Understanding and supporting your information network security and compliance obligations
- Empowering you to enable employees to access, research and share information through our reliable, flexible network
- Working with your existing technology vendors
- Providing access to cloud and storage services
- Maintaining accountability — we're here for you 24/7/365 via phone or email

## Your dedicated, efficient network architecture partner

KsFiberNet supplies a dedicated Ethernet network that's built on capabilities, reliability and flexibility. With more than 40 points of presence (PoPs) across Kansas, we ensure that our network reaches more statewide locations than any other service provider — quickly, securely and reliably.

Whether you have big-city communication demands or small-town connectivity issues, get ready, Kansas: Your future is here and now.
